

VICTOR

LUBRICANTS

Victor International GmbH

Victor International GmbH Our company offers high-performance and innovative lubricants for different areas of application. All our products meet national and international standards and are carefully monitored during development, production, bottling, and marketing. Most topical certifications are without saying for us. We have a management system for quality and environment.

Engine Flush

VICTOR Engine Flush is effective flushing agent for removing sludge and wear soots residuals of engine parts, including the parts of the oil system. Product purify and protect the oil system and filter of oil pumps. During the washing process, it provides reliable lubrication, preventing wear of engine parts. Due to the unique composition of detergent-dispersing additives, it guarantees highly effective and safe removal of carbon deposits, including from the bottom of the engine

Engine Care & Protect

VICTOR Engine Care & Protect - A new formula of a highly effective additives package for increased wear and tear protection properties of all types of engine oils, especially in places where the lubricating film is exposed to high performance, for best optimal lubrication to guarantee the minimum wear and tear as well as a long life span of the engine and aggregates! Easy to use. Reduces friction and prevents from wear and tear. Increases operational reliability at high temperatures. Protects against oil dilution caused by fuel.

Automatic Transmission Care

VICTOR Automatic Transmission Care Protection formula, developed based on the highest requirements and recommendations to enhance and protect vehicles transmission technology. Excellent wear protection and favorable friction behavior. Provides extremely good lubrication properties and outstanding corrosion protection. Prevents frothing. Maintains the performance of transmission gear systems. Ensures soft shifting with direct response and prompt acceleration. Supports the cleaning effect of the transmission fluid. Protects from corrosion and early wear.
