CERAMIC ENGINE PROTECT

PRODUCT DESCRIPTION

VICTOR Ceramic Engine Protect is an advanced engine oil additive formulated with ceramic-based technology to provide enhanced protection against friction and wear. Its innovative formula is designed to support the formation of a durable protective layer on metal surfaces, helping reduce metal-to-metal contact and improve engine efficiency. It supports smoother engine operation, helps minimize mechanical noise, and contributes to long-lasting engine protection under demanding driving conditions.

ADVANTAGES

- Helps reduce friction and wear between moving engine components.
- Supports the formation of a durable protective layer on metal surfaces.
- Helps protect engine components under high temperatures and heavy loads.
- Promotes smoother and quieter engine operation.
- Helps improve engine efficiency by reducing frictional losses.
- Provides additional protection during cold starts.
- Supports extended engine service life by minimizing mechanical wear.
- Helps maintain reliable engine performance under demanding operating conditions.

APPLICATION & ACTION

- WORKS DURING OPERATION
- ADDED TO ENGINE OIL
- LONG-LASTING PROTECTION

VICTOR LUBRICANTS

PREMIUM PERFORMANCE
ADDITIVES
MADE IN GERMANY

NANO ENGINE PROTECT & SEAL

PRODUCT DESCRIPTION

VICTOR Nano Engine Protect & Seal is an engine oil additive formulated to support internal engine protection and seal care. Its nano-based protective technology helps reduce friction and wear on lubricated surfaces, while seal-conditioning components help maintain the flexibility of elastomer seals. The formula supports reliable lubrication, helps limit deposit formation, and promotes smoother, quieter engine operation.

ADVANTAGES

- Helps reduce friction and wear on internal engine components.
- Supports a protective lubricating layer on metal surfaces.
- Helps maintain the flexibility of engine oil seals.
- Supports effective sealing and helps limit minor seal-related oil loss.
- Helps protect lubricated components against corrosion.
- Helps minimize deposit formation within the oil system.
- Promotes smoother and quieter engine operation.

APPLICATION & ACTION

- WORKS DURING OPERATION
- ADDED TO ENGINE OIL
- LONG-LASTING PROTECTION

VICTOR® LUBRICANTS

ADDITIVES
MADE IN GERMANY

ENGINE CARE & PROTECT

PRODUCT DESCRIPTION

VICTOR Engine Care & Protect is a high-performance engine oil additive specially formulated to enhance engine protection, reduce friction, and minimize wear. Its advanced anti-wear technology helps strengthen the lubricating oil film, providing additional protection for critical engine components under demanding operating conditions. The formula promotes smoother engine operation, supports reliable lubrication, and helps maintain engine efficiency, particularly in high-mileage engines and under heavy loads.

ADVANTAGES

- Helps reduce friction and wear while supporting engine efficiency.
- Enhances oil film stability for improved engine protection.
- Helps protect critical engine components during cold starts.
- Promotes smoother and quieter engine operation.
- Supports reliable lubrication under high temperatures and heavy loads.
- Helps minimize mechanical wear in high-mileage engines for long-term durability.
- Helps maintain engine cleanliness and reduce deposit formation.

APPLICATION & ACTION

- WORKS DURING OPERATION
- ADDED TO ENGINE OIL
- LONG-LASTING PROTECTION

OIL BOOSTER

PRODUCT DESCRIPTION

VICTOR Oil Booster is a multifunctional engine oil additive specially developed to enhance the lubricating and protective properties of engine oil. Its advanced additive technology helps reduce friction and wear, supports stable lubrication, and provides additional protection for critical engine components. The formula is designed to help maintain engine performance, combat harmful deposits and corrosion, and support reliable operation under demanding driving conditions.

ADVANTAGES

- Enhances lubrication and oil protection under demanding conditions.
- Helps reduce friction and mechanical wear between engine components.
- Provides additional protection against corrosion and harmful engine acids.
- Helps minimize deposit formation in the lubrication system.
- Promotes smoother, more efficient, and reliable engine operation.
- Supports long-term durability and protection of critical engine components.
- May help reduce oil consumption, depending on engine condition.

APPLICATION & ACTION

- WORKS DURING OPERATION
- ADDED TO ENGINE OIL
- ENHANCED OIL PROTECTION

ENGINE OIL STOP LEAK

PRODUCT DESCRIPTION

VICTOR Engine Oil Stop Leak is a specially developed engine oil additive designed to help reduce oil leakage caused by hardened or aged elastomer seals. Its advanced seal-conditioning formula supports the restoration of seal flexibility, helping maintain effective sealing performance and minimize oil loss. The product works within the engine lubrication system to support reliable operation and reduce the need for frequent oil top-ups caused by minor seal-related leaks.

ADVANTAGES

- Helps reduce minor engine oil leaks caused by aged seals.
- Supports the flexibility and elasticity of compatible rubber seals.
- Promotes effective sealing performance.
- Helps minimize oil loss and unnecessary oil top-ups.
- Supports reliable engine lubrication.
- Easy application without engine disassembly.
- Works during normal engine operation, subject to product instructions.
- Provides a practical maintenance solution for minor seal-related leakage.

APPLICATION & ACTION

WORKS DURING OPERATION | ADDED TO ENGINE OIL | HELPS STOP OIL LEAKS

ENGINE PURIFIER

PRODUCT DESCRIPTION

VICTOR Engine Purifier is a pre-oil-change engine cleaner formulated to loosen sludge, oil residues, and deposits within the lubrication system. Its detergent-dispersant action helps keep loosened contaminants suspended for removal with the used oil. Designed for petrol and diesel engines, it supports cleaner internal components and prepares the lubrication system for fresh engine oil.

ADVANTAGES

- Helps loosen sludge and accumulated oil deposits.
- Cleans internal oil passages and lubrication system components.
- Helps disperse contaminants for removal with used oil.
- Targets residues in difficult-to-reach areas of the oil system.
- Supports oil circulation by reducing deposit build-up.
- Prepares the engine for fresh oil during servicing.
- Suitable for petrol and diesel engines.

APPLICATION & ACTION

- WORKS DURING ENGINE FLUSH
- ADDED TO ENGINE OIL BEFORE CHANGE
- HELPS REMOVE SLUDGE & DEPOSITS

HYDRAULIC LIFTER ADDITIVES

PRODUCT DESCRIPTION

VICTOR Hydraulic Lifter Additives is a specially developed engine oil additive designed to support the proper operation of hydraulic valve lifters. Its advanced formula helps reduce lifter noise associated with deposits and restricted oil flow, while supporting cleaner oil passages and reliable lubrication of sensitive valve train components. The product promotes smoother, quieter engine operation and helps maintain the performance of the hydraulic lifter system.

ADVANTAGES

- Reduced hydraulic lifter ticking and operating noise.
- Improved cleanliness of hydraulic lifters and fine oil passages.
- Supports proper oil flow to sensitive valve train components.
- Enhanced lubrication of hydraulic lifter mechanisms.
- Smoother and quieter engine operation.
- Reduced risk of deposit-related lifter sticking.
- Supports reliable hydraulic valve train performance.
- Easy application through the engine oil system.

APPLICATION & ACTION

WORKS DURING OPERATION | ADDED TO ENGINE OIL | LONG-LASTING PROTECTION

ENGINE FLUSH

PRODUCT DESCRIPTION

VICTOR Engine Flush is a specially formulated engine cleaning additive designed to remove sludge, oil deposits, and accumulated contaminants from the engine lubrication system before an oil change. Its advanced cleaning technology helps dissolve and disperse unwanted residues, supporting cleaner oil passages and improved oil circulation. The formula prepares the engine for fresh oil, promoting efficient lubrication and reliable engine operation.

ADVANTAGES

- Effective removal of sludge and accumulated oil deposits.
- Thorough cleaning of the engine lubrication system.
- Improved cleanliness of internal engine components.
- Dissolution and dispersion of harmful contaminants.
- Supports cleaner oil passages and proper oil circulation.
- Prepares the engine for fresh engine oil.
- Promotes efficient lubrication and smoother engine operation.
- Convenient cleaning process before an oil change.

APPLICATION & ACTION

- WORKS DURING ENGINE FLUSH
- ADDED TO ENGINE OIL BEFORE CHANGE
- HELPS REMOVE SLUDGE & DEPOSITS

FUEL SYSTEM CLEANER & GUARD

PRODUCT DESCRIPTION

VICTOR Fuel System Cleaner & Guard is an advanced fuel additive developed to combine effective fuel system cleaning with additional protection against deposit formation. Its specially designed formula targets deposits and contaminants in fuel injectors and other critical fuel system components, supporting consistent fuel delivery and efficient combustion. The protective additive technology is designed to maintain fuel system cleanliness, promote smoother engine operation & support reliable engine performance over time.

ADVANTAGES

- Combines fuel system cleaning with additional protective care.
- Removes deposits that may affect fuel injector performance.
- Helps minimize the formation of new deposits in the fuel system.
- Supports the cleanliness and condition of critical fuel system components.
- Promotes consistent fuel flow and injector operation.
- Supports more effective fuel combustion and engine response.
- Contributes to stable and reliable engine performance.
- Helps maintain fuel system efficiency between maintenance intervals.

APPLICATION & ACTION

- ADDED TO FUEL TANK
- WORKS DURING ENGINE OPERATION
- CLEANS & PROTECTS FUEL SYSTEM COMPONENTS

FUEL SYSTEM CLEANER

PRODUCT DESCRIPTION

VICTOR Fuel System Cleaner is a specially formulated fuel additive designed to clean the fuel system and remove deposits that may accumulate in fuel injectors and other critical fuel system components. Its advanced cleaning formula helps restore fuel system cleanliness, supports consistent fuel delivery, and promotes efficient combustion. Regular use can contribute to smoother engine operation, improved throttle response, and reliable engine performance.

ADVANTAGES

- Removes deposits and accumulated contaminants from the fuel system.
- Reduces deposits that may interfere with injector operation.
- Supports consistent fuel flow and proper fuel distribution.
- Promotes effective fuel combustion and stable engine performance.
- Helps minimize irregular running associated with fuel system deposits.
- Supports smoother acceleration and throttle response.
- Helps maintain cleaner fuel system components.
- Contributes to maintaining engine efficiency and drivability.

APPLICATION & ACTION

- ADDED TO FUEL TANK
- WORKS DURING ENGINE OPERATION
- CLEANS & PROTECTS FUEL SYSTEM COMPONENTS

FUEL INJECTOR CLEANER

PRODUCT DESCRIPTION

VICTOR Fuel Injector Cleaner is a specially formulated fuel additive developed to remove deposits and contaminants from fuel injectors, supporting precise fuel delivery and consistent spray performance. Its advanced cleaning technology targets deposit build-up that can interfere with injector operation, promoting efficient fuel atomization and more uniform combustion. The formula supports smoother engine operation, improved throttle response, and reliable engine performance while helping maintain injector cleanliness.

ADVANTAGES

- Effective cleaning of fuel injectors and accumulated deposits.
- Improved fuel spray pattern and atomization.
- Optimized fuel delivery for efficient combustion.
- Smoother engine operation and reduced rough idling.
- Enhanced throttle response and acceleration.
- Reduced deposit build-up for lasting injector cleanliness.
- Supports reliable engine performance and fuel efficiency.

APPLICATION & ACTION

- ADDED TO FUEL TANK
- WORKS DURING ENGINE OPERATION
- CLEANS FUEL INJECTORS

OCTANE BOOSTER

PRODUCT DESCRIPTION

VICTOR Octane Booster is a specially formulated petrol additive designed to increase the octane rating of gasoline and improve its resistance to engine knocking. By supporting more controlled combustion, it helps reduce knocking and promotes smoother engine operation, particularly under demanding driving conditions. Its performance-enhancing formula is developed to support engine responsiveness, acceleration, and efficient operation.

ADVANTAGES

- Enhances the anti-knock properties of gasoline.
- Helps minimize knocking and premature combustion.
- Supports smoother, more controlled combustion.
- Promotes responsive acceleration and drivability.
- Supports stable performance under demanding conditions.
- Helps engines operate more effectively when higher-octane fuel is beneficial.
- Provides a practical way to enhance gasoline octane quality.

APPLICATION & ACTION

- ADDED TO FUEL TANK
- WORKS DURING ENGINE OPERATION
- INCREASES OCTANE RATING

OCTANE BOOSTER PLUS

PRODUCT DESCRIPTION

VICTOR Octane Booster PLUS is an advanced petrol additive developed to enhance the octane rating of gasoline and provide improved resistance to engine knocking. Designed for engines that benefit from higher-octane fuel, its performance-focused formula supports controlled combustion, smoother acceleration, and consistent engine response, particularly under demanding driving conditions.

ADVANTAGES

- Enhances gasoline octane rating and improves resistance to engine knocking.
- Reduces the risk of abnormal combustion & supports smoother engine operation.
- Promotes stable and controlled combustion for consistent engine performance.
- Improves throttle response and supports smoother acceleration.
- Maintains reliable engine operation under demanding driving conditions.
- Minimizes engine roughness associated with fuel knocking.
- Supports optimal performance in engines that benefit from higher-octane fuel.

APPLICATION & ACTION

- ADDED TO FUEL TANK
- WORKS DURING ENGINE OPERATION
- INCREASES OCTANE RATING

VICTOR LUBRICANTS

PREMIUM PERFORMANCE
ADDITIVES
MADE IN GERMANY

PETROL APPLICATOR SPRAY

PRODUCT DESCRIPTION

VICTOR Petrol Applicator Spray is a specially formulated cleaning spray designed to remove dirt, oil residues, and carbon deposits from throttle bodies and accessible air intake components in petrol engines. Its targeted cleaning action helps maintain clean airflow passages, supports smooth throttle operation, and promotes stable engine performance. Ideal for routine maintenance, it contributes to improved engine responsiveness and smoother idling when performance is affected by accumulated deposits.

ADVANTAGES

- Effectively removes dirt, oil residues, and carbon deposits.
- Cleans throttle bodies and accessible air intake components.
- Supports smooth throttle operation and consistent airflow.
- Helps reduce rough idling caused by accumulated deposits.
- Promotes improved throttle response and smoother acceleration.
- Restores cleanliness to critical air intake passages.
- Supports reliable engine operation and overall drivability.

APPLICATION & ACTION

- SPRAY ON PETROL ENGINE COMPONENTS
- CLEANS THROTTLE BODY, INTAKE & CARBURETOR PARTS
- REMOVES DEPOSITS FOR SMOOTH ENGINE PERFORMANCE

CATALYTIC SYSTEM CLEANER

PRODUCT DESCRIPTION

VICTOR Catalytic System Cleaner is a specially formulated petrol additive developed to support the cleanliness and efficiency of the catalytic converter and associated emission control system. Its advanced cleaning action helps reduce combustion-related deposits that may affect exhaust system performance, promoting cleaner combustion and more efficient emission control. Regular use supports smoother engine operation and helps maintain the performance of the catalytic system.

ADVANTAGES

- Reduces combustion-related deposits that may affect catalytic system efficiency.
- Supports the cleanliness and performance of the catalytic converter.
- Promotes cleaner combustion and more efficient exhaust gas treatment.
- Helps maintain the effectiveness of the emission control system.
- Supports smoother engine operation and consistent performance.
- Contributes to reducing deposit-related exhaust emissions.
- Helps maintain catalytic system efficiency during regular vehicle operation.

APPLICATION & ACTION

- ADDED TO FUEL TANK
- WORKS DURING ENGINE OPERATION
- CLEANS & RESTORES CATALYTIC CONVERTER PERFORMANCE

CATALYTIC CLEAN PLUS

PRODUCT DESCRIPTION

VICTOR Catalytic Clean Plus is a specialized cleaning solution developed for targeted treatment of catalytic converter systems in petrol vehicles. Its advanced cleaning formula is designed to loosen and remove accumulated soot and combustion-related deposits from accessible exhaust system components. By supporting cleaner exhaust passages and maintaining catalytic system efficiency, it contributes to smoother engine operation and more consistent emission control performance.

ADVANTAGES

- Targets soot and combustion-related deposits within the catalytic system.
- Provides focused cleaning action for accessible exhaust system components.
- Helps maintain catalytic converter cleanliness and operating efficiency.
- Supports more consistent exhaust gas flow through treated components.
- Promotes effective operation of the vehicle's emission control system.
- Helps reduce performance issues associated with deposit accumulation.
- Offers a practical spray-based solution for targeted catalytic system maintenance.

APPLICATION & ACTION

- SPRAY ON CATALYTIC CONVERTER & EXHAUST SYSTEM
- WORKS ON CONTACT TO REMOVE CARBON DEPOSITS
- RESTORES PERFORMANCE AND IMPROVES EMISSIONS EFFICIENCY

AIR INTAKE CLEANER

PRODUCT DESCRIPTION

VICTOR Air Intake Cleaner is a specially formulated cleaning solution developed to remove carbon deposits, oil residues, and accumulated contaminants from suitable air intake components in petrol engines. Its targeted cleaning action supports cleaner intake passages and more consistent airflow, contributing to smoother engine operation and improved throttle response. Designed for effective intake system maintenance, it helps maintain engine responsiveness and reliable performance.

ADVANTAGES

- Effectively removes carbon deposits, oil residues, and accumulated dirt.
- Cleans suitable air intake passages and components.
- Supports consistent airflow and efficient engine operation.
- Helps reduce rough idling associated with intake system deposits.
- Promotes smoother throttle response and acceleration.
- Reduces deposit build-up that may affect intake system performance.
- Supports reliable engine operation and improved drivability.

APPLICATION & ACTION

- SPRAY ON AIR INTAKE COMPONENTS
- CLEANS THROTTLE BODY & SUITABLE INTAKE COMPONENTS
- RESTORES AIRFLOW AND IMPROVES ENGINE PERFORMANCE

AIR INTAKE & THROTTLE VALVE CLEANER

PRODUCT DESCRIPTION

VICTOR Air Intake & Throttle Valve Cleaner is a specially formulated cleaning spray designed to remove oily residues, dirt, and carbon deposits from throttle bodies and suitable air intake components. Its targeted cleaning action helps maintain clean air passages and smooth throttle valve movement. By reducing deposit build-up, it supports consistent airflow, smoother idling, and responsive engine operation.

ADVANTAGES

- Helps remove oily residues, dirt, and carbon deposits.
- Cleans throttle valves and suitable air intake components.
- Supports smooth throttle valve movement.
- Helps maintain clean and unobstructed air passages.
- Helps reduce deposit-related rough idling.
- Promotes smoother throttle response.
- Supports consistent airflow and engine operation.

APPLICATION & ACTION

- SPRAY ON AIR INTAKE COMPONENTS
- CLEANS THROTTLE BODY & SUITABLE INTAKE COMPONENTS
- RESTORES AIRFLOW AND IMPROVES ENGINE PERFORMANCE

VICTOR
LUBRICANTS

COOLING SYSTEM
CARE & PROTECTION

MADE IN GERMANY

RADIATOR CLEANER & PROTECTOR

PRODUCT DESCRIPTION

VICTOR Radiator Cleaner & Protector is a specially formulated cooling system treatment designed to remove rust, scale, sludge, and accumulated deposits from the internal passages of the radiator and cooling circuit. Its effective cleaning action helps restore coolant circulation and supports efficient heat transfer, contributing to stable engine operating temperatures. Enriched with corrosion-inhibiting components, the formula also provides protective care for cooling system components during the cleaning process.

ADVANTAGES

- Effectively removes rust, scale, sludge, and accumulated deposits.
- Cleans internal radiator passages and the cooling system.
- Supports improved coolant circulation and heat transfer.
- Helps maintain efficient engine cooling and temperature stability.
- Contains corrosion inhibitors to protect metal components during treatment.
- Supports the performance of radiators, water pumps, and thermostats.
- Helps maintain cooling system cleanliness and operating efficiency.

APPLICATION & ACTION

- ADDED TO RADIATOR COOLANT SYSTEM
- CLEANS, REMOVES DEPOSITS & RUST DURING OPERATION
- PROTECTS AGAINST RUST & CORROSION FOR LONGER COOLING SYSTEM LIFE

RADIATOR SEALANT

PRODUCT DESCRIPTION

VICTOR Radiator Sealant is a specially formulated cooling system additive designed to seal minor leaks and hairline cracks in radiators and cooling system components. Its sealing action helps reduce coolant loss, maintain cooling system efficiency, and protect the engine from problems caused by minor coolant leaks. It offers a convenient solution for addressing small leaks without immediate component replacement.

ADVANTAGES

- Helps seal minor leaks and hairline cracks in the cooling system.
- Reduces coolant loss caused by small leaks.
- Helps maintain proper coolant levels and cooling efficiency.
- Supports reliable operation of the engine cooling system.
- Provides a convenient solution for minor radiator leaks.
- Helps reduce the risk of engine overheating caused by coolant loss.
- May help avoid costly repairs associated with minor leaks.

APPLICATION & ACTION

- ADDED TO RADIATOR COOLANT SYSTEM
- SEALS LEAKS IN RADIATOR, HOSES & COOLING SYSTEM
- RESTORES COOLING PERFORMANCE AND PREVENTS FUTURE LEAKS

RADIATOR STOP LEAK

PRODUCT DESCRIPTION

VICTOR Radiator Stop Leak is a cooling system additive formulated to help seal minor leaks and fine cracks in compatible radiators and cooling system components. Its sealing action helps reduce coolant loss and maintain the coolant level needed for effective cooling. Designed for minor leak treatment, it supports cooling system reliability during vehicle operation.

ADVANTAGES

- Helps seal minor radiator and cooling system leaks.
- Targets fine cracks and small seepage points.
- Helps reduce coolant loss during operation.
- Supports the maintenance of proper coolant levels.
- Helps maintain cooling system efficiency.
- Supports reliable engine temperature control.
- Convenient application through the cooling system.

APPLICATION & ACTION

- ADDED TO RADIATOR COOLANT SYSTEM
- SEALS LEAKS IN RADIATOR, HOSES & COOLING SYSTEM
- RESTORES COOLING PERFORMANCE AND PREVENTS FUTURE LEAKS

RADIATOR FLUSH

PRODUCT DESCRIPTION

VICTOR Radiator Flush is a cooling system cleaner formulated to loosen and remove scale, sludge, and accumulated contaminants during cooling system servicing. Its cleaning action targets deposits within the radiator and coolant passages, supporting effective circulation and heat transfer. It prepares the cooling circuit for fresh coolant and helps maintain the efficient operation of cooling system components.

ADVANTAGES

- Helps loosen scale and accumulated deposits.
- Removes sludge and operational contaminants.
- Cleans radiator passages and the cooling circuit.
- Helps reduce deposit-related flow restrictions.
- Supports effective coolant circulation and heat transfer.
- Supports the operation of thermostats and water pumps.
- Prepares the cooling system for fresh coolant.

APPLICATION & ACTION

- ADDED TO COOLING SYSTEM
- HELPS REMOVE SCALE, SLUDGE & DEPOSITS
- PREPARES SYSTEM FOR FRESH COOLANT

VICTOR
LUBRICANTS

TRANSMISSION & GEARBOX CARE

MADE IN GERMANY

info@victorlubricants.com | www.victorlubricants.com

MADE IN GERMANY

AUTO. TRANS. CARE & PROTECT

PRODUCT DESCRIPTION

VICTOR Automatic Transmission Care & Protect is a specially developed additive designed to support the performance and protection of automatic transmission systems. Its advanced formulation helps reduce friction and wear between moving components, supports smoother gear shifting, and contributes to quieter transmission operation. It also helps maintain the condition of internal seals and supports reliable transmission performance during everyday driving.

ADVANTAGES

- Helps reduce friction and wear on internal transmission components.
- Supports smoother and more comfortable gear shifting.
- Helps minimize transmission noise and vibration.
- Supports the protection of gears, bearings, and moving parts.
- Helps maintain the flexibility and condition of internal seals.
- Contributes to consistent transmission performance during operation.
- Helps extend the service life of transmission components.

APPLICATION & ACTION

- ADDED TO AUTOMATIC TRANSMISSION FLUID
- CLEANS, LUBRICATES & IMPROVES TRANSMISSION PERFORMANCE
- PROTECTS AGAINST WEAR, EXTENDS TRANSMISSION LIFE AND ENSURES SMOOTH SHIFTING

VICTOR® LUBRICANTS

AUTO. TRANS. CLEANER

PRODUCT DESCRIPTION

VICTOR Automatic Transmission Cleaner is a specially formulated cleaning additive designed to remove sludge, deposits, and accumulated contaminants from automatic transmission systems before a transmission fluid change. Its detergent-based formula helps clean internal oil passages and transmission components, supporting efficient fluid circulation and preparing the system for fresh transmission fluid. Regular cleaning during scheduled fluid servicing helps maintain transmission cleanliness and consistent operating performance.

ADVANTAGES

- Helps remove sludge, deposits, and accumulated contaminants.
- Cleans internal transmission components and fluid passages.
- Prepares the transmission system for fresh transmission fluid.
- Helps reduce contamination caused by old transmission fluid.
- Supports efficient fluid circulation within the transmission.
- Helps maintain smooth and consistent transmission operation.
- Provides effective cleaning as part of routine transmission servicing.

APPLICATION & ACTION

- ADDED TO AUTOMATIC TRANSMISSION FLUID
- CLEANS INTERNAL PARTS, REMOVES DEPOSITS & SLUDGE
- RESTORES SMOOTH OPERATION AND PREPARES TRANSMISSION FOR FRESH FLUID

AUTO. TRANS. FLUSH

PRODUCT DESCRIPTION

VICTOR Automatic Transmission Flush is a cleaning additive developed for use before an automatic transmission fluid change. Its cleaning action helps loosen sludge, varnish, and accumulated deposits from internal components and fluid passages. By helping disperse contaminants for removal with the used fluid, it prepares the transmission for fresh ATF and supports internal system cleanliness.

ADVANTAGES

- Helps loosen sludge, varnish, and accumulated deposits.
- Cleans internal transmission fluid passages.
- Helps disperse contaminants for removal during servicing.
- Supports the cleanliness of internal components.
- Helps reduce residue build-up within the fluid circuit.
- Prepares the transmission for fresh ATF.
- Designed for use before a transmission fluid change.

APPLICATION & ACTION

ADDED TO AUTOMATIC TRANSMISSION FLUID	CLEANS INTERNAL PARTS, REMOVES DEPOSITS & SLUDGE	RESTORES SMOOTH OPERATION AND PREPARES TRANSMISSION FOR FRESH FLUID

VICTOR LUBRICANTS

PREMIUM PERFORMANCE
ADDITIVES

CVT TRANSMISSION BOOSTER

PRODUCT DESCRIPTION

VICTOR CVT Transmission Booster is a transmission fluid additive developed to support lubrication and reliable operation in compatible continuously variable transmissions. Its formulation helps maintain balanced friction characteristics, protect moving components against wear, and support smooth power transfer. It contributes to consistent transmission response and quieter operation under everyday driving conditions.

ADVANTAGES

- Supports the lubricating performance of CVT fluid.
- Helps maintain balanced friction characteristics.
- Helps protect moving components against wear.
- Supports smooth and consistent power transfer.
- Helps minimize operating noise and vibration.
- Promotes consistent transmission response.
- Supports reliable operation in compatible CVT systems.

APPLICATION & ACTION

- ADDED TO COMPATIBLE CVT FLUID
- SUPPORTS BALANCED FRICTION & SMOOTH OPERATION
- HELPS PROTECT AGAINST WEAR

info@victorlubricants.com | www.victorlubricants.com

MADE IN GERMANY

GEAR PROTECT MoS_2

PRODUCT DESCRIPTION

VICTOR Gear Protect MoS_2 is a high-performance anti-friction additive specially developed for manual gearboxes and suitable gear drive systems. Enriched with molybdenum disulfide (MoS_2), its advanced formula helps form a protective lubricating layer on metal surfaces, reducing friction and wear under demanding operating conditions. It supports smoother gear operation, minimizes mechanical noise, and helps protect transmission components for reliable, long-lasting performance.

ADVANTAGES

- Helps reduce friction and wear between moving gear components.
- Forms a protective MoS_2 lubricating layer on metal surfaces.
- Supports smoother gear shifting and quieter operation.
- Helps protect gears and bearings under heavy loads.
- Reduces metal-to-metal contact during demanding operation.
- Supports the durability and service life of gearbox components.
- Suitable for compatible manual gearboxes using mineral or synthetic gear oils.

APPLICATION & ACTION

- ADDED TO GEAR OIL IN MANUAL GEARBOXES, DIFFERENTIALS & TRANSFER CASES
- FORMS A STRONG MoS_2 PROTECTIVE LAYER ON GEAR SURFACES
- REDUCES WEAR, FRICTION & NOISE AND EXTENDS GEAR LIFE UNDER HEAVY LOADS

GEAR OIL MEDICINE

PRODUCT DESCRIPTION

VICTOR Gear Oil Medicine is an automatic transmission fluid treatment formulated to enhance lubrication and protect internal transmission components. It helps reduce friction and wear, provides corrosion protection, and helps control foaming. Its formulation supports smoother gear changes, consistent transmission response, and reliable operation under everyday driving conditions.

ADVANTAGES

- Enhances lubrication of internal transmission components.
- Helps reduce friction and mechanical wear.
- Supports smoother gear changes and consistent response.
- Helps protect metal components against corrosion.
- Helps reduce foaming in transmission fluid.
- Supports transmission cleanliness.
- Helps maintain reliable automatic transmission performance.

APPLICATION & ACTION

- ADDED TO AUTOMATIC TRANSMISSION FLUID
- CLEANS, LUBRICATES & IMPROVES TRANSMISSION PERFORMANCE
- PROTECTS AGAINST WEAR, EXTENDS TRANSMISSION LIFE AND ENSURES SMOOTH SHIFTING

VICTOR
LUBRICANTS

POWER STEERING
CARE & PROTECTION

MADE IN GERMANY

MADE IN GERMANY

POWER STEERING CARE & PROTECT

PRODUCT DESCRIPTION

VICTOR Power Steering Care & Protect is a specially formulated additive designed to support lubrication and protection in hydraulic power steering systems. It helps protect internal components against friction, wear, and corrosion while supporting resistance to fluid oxidation and foam formation. Its formulation helps reduce operating noise and promotes smooth, consistent steering assistance for reliable system performance.

ADVANTAGES

- Helps reduce friction and wear on internal components.
- Helps protect metal surfaces against rust and corrosion.
- Supports resistance to fluid oxidation.
- Helps reduce foam formation in power steering fluid.
- Supports effective lubrication of moving components.
- Helps minimize power steering operating noise.
- Promotes smooth and consistent steering assistance.

APPLICATION & ACTION

- ADDED TO POWER STEERING FLUID
- SUPPORTS SMOOTH & QUIET OPERATION
- HELPS PROTECT AGAINST WEAR & CORROSION

POWER STEERING SYSTEM CLEANER

PRODUCT DESCRIPTION

VICTOR Power Steering System Cleaner is a specially formulated cleaning additive developed to remove sludge, varnish, and accumulated deposits from hydraulic power steering systems. Its cleaning action helps loosen contaminants within the pump, fluid passages, and steering components, preparing the system for fresh fluid during servicing. It supports cleaner internal components and effective fluid circulation for consistent steering assistance.

ADVANTAGES

- Helps remove sludge, varnish, and accumulated deposits.
- Cleans internal hydraulic power steering components.
- Helps loosen contaminants within fluid passages.
- Supports effective fluid circulation.
- Helps reduce deposit-related restrictions.
- Prepares the system for fresh power steering fluid.
- Supports consistent hydraulic steering operation.

APPLICATION & ACTION

- ADDED TO POWER STEERING FLUID
- HELPS REMOVE SLUDGE & DEPOSITS
- PREPARES SYSTEM FOR FRESH FLUID

POWER STEERING BOOSTER

PRODUCT DESCRIPTION

VICTOR Power Steering Booster is a multifunctional additive formulated to enhance the performance of hydraulic power steering fluid. It supports effective lubrication, helps optimize friction characteristics, and assists in keeping internal components clean. Its formulation promotes smooth steering assistance, helps reduce operating noise, and supports fluid performance for reliable hydraulic system operation.

ADVANTAGES

- Enhances the lubricating performance of power steering fluid.
- Helps optimize friction characteristics within the system.
- Supports smooth and consistent steering assistance.
- Helps reduce pump noise associated with friction.
- Helps maintain the cleanliness of internal components.
- Supports protection against mechanical wear.
- Helps maintain fluid performance during operation.

APPLICATION & ACTION

ADDED TO POWER STEERING FLUID

ENHANCES LUBRICATION & SMOOTH STEERING

HELPS REDUCE NOISE & WEAR

DIESEL SYSTEM CLEAN & PROTECT

PRODUCT DESCRIPTION

VICTOR Diesel System Clean & Protect is a multifunctional diesel fuel additive formulated to clean and protect fuel system components. Its cleaning action helps loosen and disperse deposits that can affect injector operation and fuel delivery. The formula supports fuel system lubrication, particularly when using low-sulphur diesel, and helps limit new deposit formation. Regular use promotes smoother engine operation, consistent fuel delivery, and reliable diesel performance.

ADVANTAGES

- Helps remove deposits from diesel fuel system components.
- Cleans injectors and supports consistent fuel delivery.
- Helps disperse residues and accumulated contaminants.
- Supports lubrication when using low-sulphur diesel.
- Helps reduce new deposits in the injection system.
- Promotes smoother engine operation and response.
- Helps maintain fuel system cleanliness and reliability.

APPLICATION & ACTION

- ADDED TO FUEL TANK
- WORKS DURING ENGINE OPERATION
- CLEANS & PROTECTS FUEL SYSTEM COMPONENTS

DIESEL SYSTEM CLEANER PLUS

PRODUCT DESCRIPTION

VICTOR Diesel System Cleaner Plus is a diesel fuel additive formulated to clean fuel system components and support reliable injection performance. Its cleaning action helps loosen deposits that can affect fuel delivery and injector spray patterns. The formula also supports lubrication and protection of the high-pressure fuel pump and other fuel-contact components, promoting smoother engine operation and consistent diesel performance.

ADVANTAGES

- Helps remove deposits from diesel fuel system components.
- Supports cleaner injectors and consistent fuel delivery.
- Helps maintain effective fuel atomization.
- Supports lubrication of the high-pressure fuel pump.
- Helps protect fuel-contact components against wear.
- Helps limit new deposit formation.
- Promotes smoother engine operation and response.

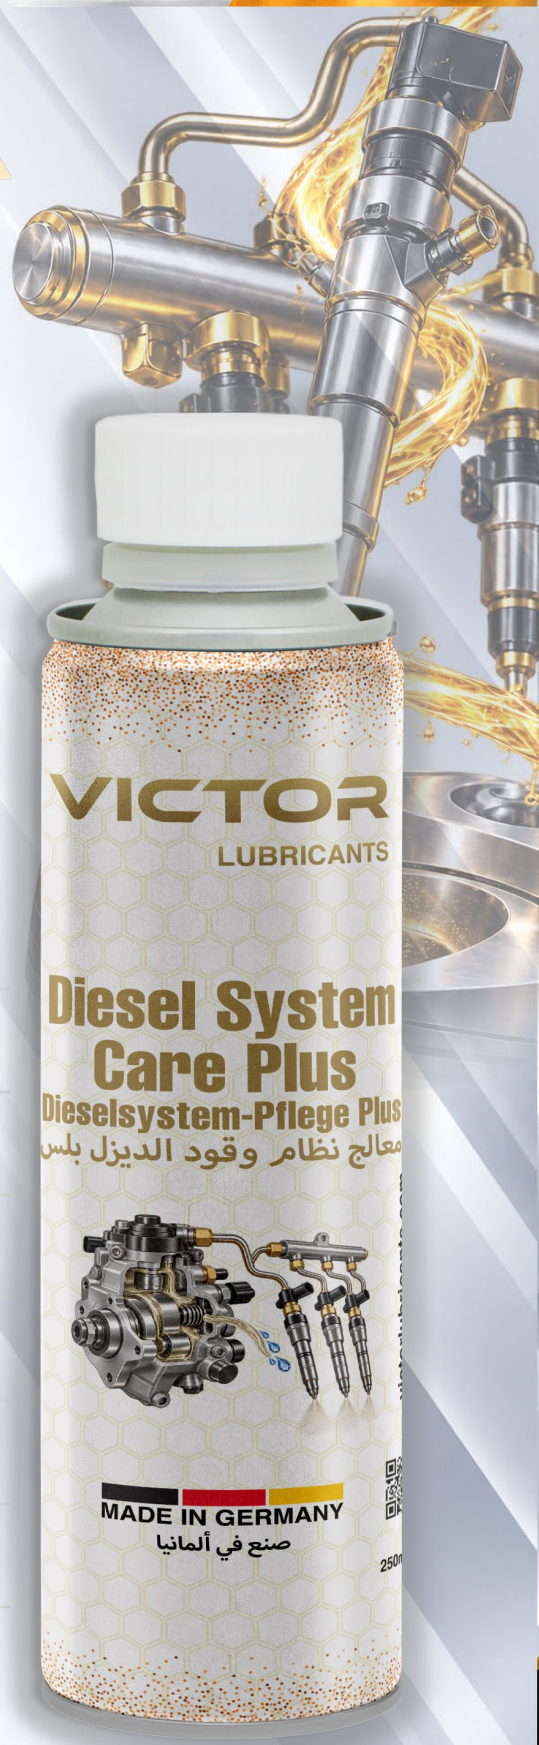

APPLICATION & ACTION

- ADDED TO FUEL TANK
- WORKS DURING ENGINE OPERATION
- CLEANS & PROTECTS FUEL SYSTEM COMPONENTS

DIESEL SYSTEM CARE PLUS

PRODUCT DESCRIPTION

VICTOR Diesel System Care Plus is a multifunctional diesel fuel additive formulated to clean, lubricate and protect fuel system components. It helps remove moisture and fuel-related deposits while supporting the lubrication of the high-pressure pump and other fuel-carrying parts. Its combined care action helps maintain effective fuel atomisation, smooth engine operation and consistent performance.

ADVANTAGES

- Helps remove moisture from the diesel fuel system.
- Helps clean fuel-related deposits and residues.
- Supports lubrication of fuel system components.
- Helps protect the high-pressure fuel pump.
- Helps maintain effective fuel atomisation.
- Supports smooth engine operation and consistent performance.
- Convenient application directly through the diesel fuel tank.

APPLICATION & ACTION

- ADDED TO DIESEL FUEL TANK
- HELPS REMOVE MOISTURE & DEPOSITS
- LUBRICATES & PROTECTS FUEL SYSTEM

AIR INTAKE CLEANER-DIESEL

PRODUCT DESCRIPTION

VICTOR Air Intake Cleaner-Diesel is a diesel fuel additive developed to support engine cleanliness and efficient combustion. Added directly to the diesel fuel tank, it helps reduce deposit build-up and maintain the cleanliness of fuel-system and combustion-related components. Its cleaning action supports consistent fuel delivery, smoother idling and responsive engine operation, helping maintain reliable performance during regular vehicle use.

ADVANTAGES

- Convenient application directly through the diesel fuel tank.
- Helps reduce deposits in fuel-system components.
- Supports the cleanliness of combustion-related components.
- Helps maintain consistent fuel delivery.
- Promotes efficient and more complete combustion.
- Supports smoother idling and consistent engine operation.
- Helps maintain engine response and reliable performance.

APPLICATION & ACTION

- ADDED TO FUEL TANK
- WORKS DURING ENGINE OPERATION
- HELPS REDUCE DEPOSITS & SUPPORTS CLEANER COMBUSTION

DIESEL SMOKE STOP

PRODUCT DESCRIPTION

VICTOR Diesel Smoke Stop is a diesel fuel additive formulated to help reduce visible black exhaust smoke and soot formation associated with incomplete combustion. Its fuel-treatment action supports more effective combustion, promoting cleaner engine operation and consistent performance. Designed for addition to diesel fuel, it helps maintain combustion quality during regular vehicle use.

ADVANTAGES

- Helps reduce visible black exhaust smoke.
- Helps limit soot formation during combustion.
- Supports more effective diesel fuel combustion.
- Promotes cleaner engine operation.
- Helps reduce combustion-related residue formation.
- Supports smooth and consistent engine performance.
- Convenient application through the diesel fuel tank.

APPLICATION & ACTION

- ADDED TO DIESEL FUEL TANK
- SUPPORTS MORE EFFECTIVE COMBUSTION
- HELPS REDUCE BLACK SMOKE & SOOT

CETANE BOOSTER

PRODUCT DESCRIPTION

VICTOR Cetane Booster is a diesel fuel additive formulated to increase the cetane number and improve fuel ignition quality. By helping reduce ignition delay, it supports more consistent combustion, easier starting, and smoother engine operation. Its formulation helps minimize diesel combustion knock and promotes responsive engine performance, particularly when using fuel with a lower cetane rating.

ADVANTAGES

- Helps increase the cetane number of diesel fuel.
- Improves fuel ignition quality.
- Helps reduce ignition delay.
- Supports easier starting and smoother engine operation.
- Helps minimize diesel combustion knock.
- Promotes consistent and controlled combustion.
- Supports engine response when fuel cetane quality is limited.

APPLICATION & ACTION

- ADDED TO DIESEL FUEL TANK
- HELPS INCREASE CETANE NUMBER
- IMPROVES IGNITION QUALITY

DPF PURIFIER

PRODUCT DESCRIPTION

VICTOR DPF Purifier is a diesel fuel additive developed for routine diesel particulate filter care. It supports the filter's regeneration process and helps reduce soot build-up, contributing to consistent exhaust gas flow and maintained filter performance. Added directly to the diesel fuel tank, it offers a convenient preventive treatment as part of regular quick-service maintenance.

ADVANTAGES

- Supports routine DPF care and preventive maintenance.
- Helps promote the combustion of trapped soot during regeneration.
- Helps limit soot build-up within the filter.
- Supports consistent exhaust gas flow.
- Helps maintain diesel particulate filter performance.
- Convenient addition to regular quick-service maintenance.
- Easy application directly through the diesel fuel tank.

APPLICATION & ACTION

- ADDED TO DIESEL FUEL TANK
- SUPPORTS DPF REGENERATION
- HELPS REDUCE SOOT BUILD-UP

DPF CLEANER

PRODUCT DESCRIPTION

VICTOR DPF Cleaner is a diesel fuel additive formulated to help reduce soot accumulation in diesel particulate filters. It supports the combustion of trapped soot during regeneration, helping maintain filter performance and exhaust gas flow. Added directly to the diesel fuel tank, it provides a convenient treatment for DPF care as part of scheduled maintenance.

ADVANTAGES

- Helps reduce soot accumulation within the DPF.
- Supports the combustion of trapped soot during regeneration.
- Helps maintain exhaust gas flow through the filter.
- Supports diesel particulate filter performance.
- Suitable for use as part of scheduled DPF maintenance.
- Convenient application directly through the diesel fuel tank.
- Easy to incorporate into regular diesel vehicle servicing.

APPLICATION & ACTION

- ADDED TO DIESEL FUEL TANK
- HELPS REDUCE DPF SOOT DEPOSITS
- SUPPORTS FILTER REGENERATION

MADE IN GERMANY

AIRCON CLEANER

PRODUCT DESCRIPTION

VICTOR Aircon Cleaner is formulated for cleaning vehicle air-conditioning systems and helping reduce unpleasant odours. It helps remove accumulated dirt and residues from treated areas and sanitise air passages, supporting a cleaner system and a fresher vehicle interior. Its refreshing action helps maintain a pleasant scent during regular use. Designed for convenient application during routine air-conditioning maintenance.

ADVANTAGES

- Helps clean treated air-conditioning system components.
- Helps loosen accumulated dirt and residues.
- Helps reduce unpleasant air-conditioning odours.
- Leaves a pleasant, fresh scent.
- Supports a fresher vehicle interior.
- Convenient for routine air-conditioning maintenance.
- Helps maintain cleanliness in treated areas.

APPLICATION & ACTION

- CLEANS AIR-CONDITIONING SYSTEMS
- HELPS SANITISE AIR PASSAGES
- HELPS REDUCE ODOURS & FRESHENS AIR

CARBURETTOR CLEANER

PRODUCT DESCRIPTION

VICTOR Carburettor Cleaner is a solvent-based cleaning spray formulated to dissolve and remove dirt, oily residues and deposits from carburettor components. Its targeted cleaning action reaches accessible throttle plates, venturis, jets and internal and external surfaces, helping maintain clean passages and smooth component operation. Designed for carburettor maintenance, it supports stable idling, easier starting and responsive engine performance when affected by deposit build-up.

ADVANTAGES

- Helps dissolve dirt, oily residues and accumulated deposits.
- Cleans accessible carburettor jets and fuel passages.
- Removes deposits from throttle plates and venturi surfaces.
- Suitable for cleaning internal and external carburettor surfaces.
- Helps reduce deposit-related rough idling.
- Supports easier starting and smoother engine response.
- Provides targeted spray application for routine maintenance.

APPLICATION & ACTION

- SPRAY ON CARBURETTOR COMPONENTS
- HELPS REMOVE OIL & DEPOSITS
- SUPPORTS SMOOTH CARBURETTOR OPERATION

MONTAGE CLEANER

PRODUCT DESCRIPTION

VICTOR Montage Cleaner is a cleaning and degreasing spray formulated to remove dirt, oil, grease and technical fluid residues from suitable metal components. Its cleaning action helps prepare parts for inspection, assembly and maintenance. Designed for workshop use, it provides targeted cleaning of accessible metal parts, tools and mechanical assemblies during vehicle servicing and repair.

ADVANTAGES

- Removes dirt and accumulated surface contamination.
- Helps dissolve oil and grease residues.
- Helps remove brake fluid and other technical fluid residues.
- Cleans suitable metal components and workshop tools.
- Prepares parts for inspection and assembly.
- Helps simplify cleaning during maintenance and repair.
- Provides targeted spray application on accessible components.

APPLICATION & ACTION

- SPRAY ON SUITABLE METAL PARTS
- REMOVES OIL, GREASE & RESIDUES
- PREPARES PARTS FOR ASSEMBLY

ELECTRICAL CONTACT CLEANER

PRODUCT DESCRIPTION

VICTOR Electrical Contact Cleaner is a specialised cleaning spray formulated to remove dirt, oil, grease and contamination from electrical terminals, plug contacts and switching connections. By cleaning contact surfaces, it helps reduce contamination-related contact resistance and supports reliable electrical connections. Designed for targeted application during electrical maintenance, it helps maintain clean contact points and consistent electrical performance.

ADVANTAGES

- Cleans electrical terminals and contact surfaces.
- Helps remove dirt and accumulated contamination.
- Dissolves oil and grease residues on treated contacts.
- Helps reduce contamination-related contact resistance.
- Helps minimise voltage drop associated with dirty contacts.
- Supports reliable electrical connections.
- Provides targeted cleaning of accessible plug and switch contacts.

APPLICATION & ACTION

- CLEANS ELECTRICAL CONTACTS
- REMOVES OIL, GREASE & DIRT
- HELPS REDUCE CONTACT RESISTANCE

RUST REMOVER & CLEANER PLUS

PRODUCT DESCRIPTION

VICTOR Rust Remover & Cleaner Plus is a multifunctional penetrating spray formulated to help loosen rust-seized connections, clean metal surfaces and lubricate moving parts. Its penetrating action helps reach tight gaps in corroded nuts, bolts and joints, facilitating dismantling and maintenance. The formula displaces moisture and leaves a lubricating film that helps protect treated metal surfaces against rust and corrosion.

ADVANTAGES

- Helps loosen rust-seized nuts, bolts and metal connections.
- Penetrates tight gaps in corroded joints.
- Helps free sticking mechanisms and moving parts.
- Helps loosen oily dirt and surface residues.
- Lubricates treated components and helps reduce squeaking.
- Displaces moisture from treated metal surfaces.
- Helps protect treated parts against rust and corrosion.

APPLICATION & ACTION

- LOOSENS RUST-SEIZED PARTS
- CLEANS & LUBRICATES
- DISPLACES MOISTURE & HELPS PROTECT

PENETRATING OIL RUST REMOVER

PRODUCT DESCRIPTION

VICTOR Penetrating Oil Rust Remover is a penetrating lubricant formulated to help release rust-seized fasteners and sticking mechanical components. Its creeping action helps carry lubricating agents into tight gaps around threads, joints and contact surfaces, easing dismantling and maintenance. The formula displaces moisture, lubricates moving parts and helps protect treated metal surfaces against rust and corrosion.

ADVANTAGES

- Helps release rust-seized nuts, bolts and fasteners.
- Penetrates tight gaps around threads and corroded joints.
- Helps free sticking hinges and mechanical components.
- Lubricates treated surfaces to support smoother movement.
- Helps reduce friction-related squeaking and creaking.
- Displaces moisture from treated metal surfaces.
- Helps protect treated components against rust and corrosion.

APPLICATION & ACTION

- PENETRATES RUST-SEIZED JOINTS
- HELPS RELEASE STUCK PARTS
- LUBRICATES & PROTECTS METAL

WHITE LITHIUM GREASE SPRAY

PRODUCT DESCRIPTION

VICTOR White Lithium Grease Spray is formulated to lubricate moving mechanical components and help protect metal surfaces against moisture, rust and corrosion. It forms an adhering grease film that helps reduce friction, wear and unwanted squeaking, supporting smooth movement of hinges, latches, gears and bearings where grease lubrication is specified. Suitable for routine automotive maintenance and servicing.

ADVANTAGES

- Provides lasting lubrication for suitable moving components.
- Forms an adhering grease film on treated surfaces.
- Helps reduce friction and wear at contact points.
- Helps eliminate friction-related squeaking and creaking.
- Supports smooth movement of hinges, latches and mechanisms.
- Helps protect metal surfaces against moisture and corrosion.
- Allows convenient, targeted application to accessible lubrication points.

APPLICATION & ACTION

- LUBRICATES MOVING PARTS
- REDUCES FRICTION & SQUEAKING
- PROTECTS AGAINST MOISTURE & CORROSION

ENGINE DEGREASER FOAM

PRODUCT DESCRIPTION

VICTOR Engine Degreaser Foam is formulated for cleaning external engine surfaces and removing accumulated oil, grease, dirt and road grime. Its foaming action helps loosen stubborn contamination and reach uneven surfaces, supporting effective cleaning of accessible engine components. Designed for routine engine-bay cleaning and maintenance, it helps restore a clean, well-maintained appearance.

ADVANTAGES

- Helps remove oil and grease from external engine surfaces.
- Loosens accumulated dirt and road grime.
- Foaming action helps lift stubborn contamination.
- Helps clean uneven surfaces and hard-to-reach recesses.
- Removes residues that obscure the appearance of components.
- Helps restore a clean engine-bay appearance.
- Convenient spray application for routine maintenance.

APPLICATION & ACTION

- CLEANS EXTERNAL ENGINE SURFACES
- LOOSENS OIL, GREASE & GRIME
- RESTORES A CLEAN APPEARANCE

BRAKE CLEANER

PRODUCT DESCRIPTION

VICTOR Brake Cleaner is a fast-evaporating spray formulated to remove oil, grease, brake dust and dirt from brake discs, drums and suitable brake components. Its cleaning action helps dissolve contamination and leaves treated surfaces clean without oily residues. It dries rapidly after cleaning, supporting efficient maintenance with thorough cleaning and minimal waiting time. Designed for convenient use during brake servicing, inspection and maintenance.

ADVANTAGES

- Removes oil and grease from suitable brake components.
- Helps remove accumulated brake dust and dirt.
- Dissolves stubborn oily contamination.
- Evaporates quickly after application.
- Leaves no oily residues on treated surfaces.
- Suitable for cleaning brake discs, drums and compatible metal parts.
- Convenient spray application for routine brake servicing.

APPLICATION & ACTION

CLEANS BRAKE COMPONENTS

REMOVES OIL, GREASE & BRAKE DUST

EVAPORATES WITHOUT RESIDUE
